Professional Summary

Results-oriented Computer Science and Engineering student with hands-on experience in full-stack web development using React.js, Redux Toolkit, Node.js, and PostgreSQL/MongoDB. Proficient in Java, Python, JavaScript, and Object-Oriented Programming (OOP), with strong Data Structures and Algorithms (DSA) skills demonstrated through 300+ solved coding problems. Experienced in building and deploying RESTful APIs, real-time features, and database-driven applications across multiple production-quality platforms.

Technical Skills

Programming Languages: Java, Python, JavaScript, C
Frontend Development: React.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)
Backend Development: Node.js, Express.js, Supabase, Socket.io, REST API Development
Databases: PostgreSQL, MongoDB, MySQL, SQLite, Redis
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel
Core Concepts: Object-Oriented Programming (OOP), Data Structures and Algorithms (DSA), Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Development Life Cycle (SDLC)

Projects

JobArena – Full-Stack Job Portal Platform *React, Supabase, PostgreSQL, RBAC*
Live Demo: job-arena.vercel.app

- Built a full-loop job portal with Role-Based Access Control (RBAC), enabling recruiters to post and manage listings while seekers search, apply, and track application status.
- Implemented resume upload and storage alongside a structured application pipeline, keeping recruiter and seeker views cleanly separated by role.
- Designed the PostgreSQL schema via Supabase to support relational queries across job postings, applications, and user roles.

FoodArena – Unified Food, Grocery & Dining Platform *React, Redux Toolkit, Vite, Tailwind CSS*
Live Demo: food-arena-eight.vercel.app

- Built a unified platform merging Food Delivery, Grocery, and Dining into one experience with a shared cart across all three services using React 18, Redux Toolkit, and Tailwind CSS.
- Implemented advanced dietary-profile filtering (Keto, Vegan, Family Thali) and a transparent pricing breakdown showing itemized commission and delivery fees.
- Developed cart-sharing via shareable links, pre-order scheduling with 30-minute time slots, and a gamified achievement system with 7+ progress-tracked badges.

CodeArena – Competitive Programming Platform *MERN Stack, Socket.io, Redis, Cloudinary*
Live Demo: code-arena-dun-nu.vercel.app

- Built a full-stack competitive programming platform (MongoDB, Express.js, React, Node.js) featuring live coding contests with a split-pane editor and real-time Socket.io chat.
- Engineered a secure, multi-language code execution engine (C++, Java, Python, JavaScript) with server-side pagination and filtering across a problem library.
- Developed dynamic user profiles with 30-day activity visualizations (Recharts), a global leaderboard, and an admin dashboard for problem and test-case management with Cloudinary-hosted video solutions.

Achievements

- First Runner-up at Spark Startup Conclave 2026; received appreciation recognition at national/inter-college level tech hackathons including CodeRush, Hacknovate 7.0, Smart India Hackathon (SIH) 2025, and PW IOI.
- Solved 300+ Data Structures and Algorithms (DSA) problems across multiple competitive programming platforms, including topics in arrays, strings, and trees.

Education

Maharana Pratap Engineering College, Kanpur 2023 – 2027
Bachelor of Technology (B.Tech) in Computer Science & Engineering *SGPA: 7.5*
